# The Eco-Advantage™

Sustainability is a key issue in current business models for most companies. Make the decision easier. The Eco-Advantage™ is Midwest Maintenance's program to partner with you to make each step, even the small ones, count in your eco-footprint.

#### The Eco-Activation™

In your decision to go Green, Midwest Maintenance will meet with you to answer your questions, discuss advantages and eliminate your eco-anxiety

### The Eco-Navigator™

As we work with you and your assigned certification officer, our team reviews the appropriate documents to map out a plan of action in your facility

### The Eco-Compliance Audit™

We lay out a strategic plan to review all areas of your facility to meet your certification goals, documentation needs and execution of quarterly audits

The Eco-Advantage"

# The Green Consumable Alternative™

Our team evaluates your current chemical, paper and consumable products to provide Green certified alternatives

### The Green Ready Method™

Working along side of you, we will maintain ongoing inventory, safety and communication logs, facility audits and recycling while maintaining the integrity of the Green certified process

## The Eco-Replacement Plan™

Midwest Maintenance reviews your current equipment for its environmental impact in order to develop an equipment replacement recommendation plan

### The Green Entry Way™

We develop specific maintenance and cleaning logs for your public entryways as well as assist with a matting system designed for your facility
